

Fixers: FX 1

Fixative for Water-Based Applications

FX 1 is used to reduce or eliminate film defects such as craters, crawling and fish eyes. It also provides uniform films on difficult to wet or contaminated substrates.

Benefits: Fixers are specifically formulated to be highly effective at low levels without adversely effecting inter-coat adhesion.

Applications: FX 1 is an extremely effective surface control agent for conventional aqueous systems.

Typical Properties:

| | |
|---------------------------|-----------|
| Percentage Solids | 50% |
| Weight Per Gallon (lbs) | 8.59 |
| Viscosity (Gardner-Holdt) | A3 |
| FDA Cleared | Yes |
| Suggested Use Level | 0.2%-1.0% |
| VoC lbs per Gallon (GR/L) | 2.78/333 |
