

Driers: SUPER DRY 1000

Drier for Modified Polyurethane and Alkyd Applications

SUPER DRY 1000 is specially formulated to replace cobalt drier in systems where cobalt can cause adverse side effects.

Benefits:

- Reduces discoloration of polyurethane during storage
- Improves alkali resistance of polyurethane films
- Prevents loss of dry
- Greatly reduces yellowing of air dry alkyd finishes

Applications: Highly effective in oil or alkyd modified polyurethanes as well as in conventional alkyds.

Recommended Usage Levels: The following starting point recommendation is based upon 100 Lbs. of vehicle solids:

- SUPER DRY 1000 0.5 Lbs.-0.7 Lbs.
- Zirconium (as metal) 0.1 Lbs.-0.3 Lbs.
- Calcium (as metal) 0.05 Lbs.-0.10 Lbs.

Optimum Results: Combine Super Dry 1000 with zirconium and calcium

Typical Properties:

Weight per Gallon (lbs)	7.1
Specific Gravity	0.85
Solvent	Blend of Xylene and n-Butanol
