

SUPERPERSE[®] E-THREE

AQUEOUS SYSTEMS

SUPERPERSE[®] E-THREE is an environmentally friendly pigment wetting, dispersing and stabilizing agent for all types of pigments in most aqueous systems.

Benefits: **SUPERPERSE[®] E-THREE** is effective with all types of pigments. It improves wetting, provides viscosity stability, increases color acceptance and maximizes color development without promoting foam production. It also maintains the water resistance and the overall integrity of the final coating system.

Applications:

- Low VOC systems
- Alkylphenol Ethoxylate-free systems
- As a single dispersing additive for multiple pigment dispersing requirements
- As the sole dispersant or as an additive to improve resin-based dispersions

Recommended Usage Levels: When used as the sole wetting and dispersing agent, add 5 to 10% based on the weight of the pigment. When used to improve resin-based dispersions, add 2 to 3% based on the weight of the pigment. Add to water, co-solvent or vehicle prior to the addition of pigment. Optimum levels should be determined through laboratory testing.

Typical Properties:

Percentage Active Solids	44%
Gardner Color	10 Max
Weight per Gallon (lbs)	8.50
Specific Gravity	1.02
pH (10% Aqueous Solution)	10.0
