

Castor Polyols: T-923 OIL

TDI Reacted Castor Oil

T-923 OIL is a partially-reacted (TDI) castor polymer featuring broad compatibility, high gloss and durability.

Applications:

- Plasticizer (for resins, gums and polymers)
- Adhesion Promoter
- Surface Wetting Agent
- Lubricity Agent
- Penetrant
- Pigment Dispersant
- Dye Dispersant
- Coupling Solvent

Typical Properties:

Color (Gardner)	4
Acid Value	2
Viscosity (CPS)	230,000
Specific Gravity	0.99
Iodine Value	82
Hydroxyl Value	102
Saponification Value	166
